

# SAMPAD GHOSH

Bhubaneswar, West Bengal | +91-7872473809

Email [◇ LinkedIn ◇ GitHub ◇ TryHackMe ◇ Portfolio](#)

## EDUCATION

**Bachelor of Technology, Kalinga Institute of Industrial Technology** 2021-2025  
Stream: Computer Science and Electronics Engineering CGPA: 7.24  
*Relevant Courses: Data Structures & Algorithms, Operating Systems, Computer Networks, DBMS, OOPS, Bash*

## SKILLS

|                      |                                                                                                                        |
|----------------------|------------------------------------------------------------------------------------------------------------------------|
| Security Foundations | Linux, TCP/IP, DNS, ports, HTTP/HTTPS, TLS, firewalls, proxies, SSH, logs, grep, curl                                  |
| Web & API Security   | OWASP Top 10, SQL injection, authentication, access control/IDOR, XSS, CSRF, file upload, SSRF, JWT, CORS, API testing |
| WAF, VM & SIEM       | Akamai WAF concepts, bot/abuse protection, policy tuning, OneTrust, Cookie Compliance, dashboards, reports, alerts     |
| Tools & Platforms    | Burp Suite Community Edition, Wireshark, Nmap, Gobuster, ffuf, Cisco Packet Tracer, Git, GitHub, VS Code, PyCharm      |
| Languages            | Python, Bash, SQL, C, C++, JavaScript, HTML5, CSS3                                                                     |

## EXPERIENCE

- TCS | Security Analyst** March 2025 – Present | Bhubaneswar, India
- Executed OneTrust cookie compliance scanning and gap analysis alongside Akamai CDN edge security for WAF, IP control, HTTP log analysis, SSL renewals, and hostname onboarding.
  - Deliver root-cause analysis, remediation guidance, and WAF-rule recommendations in collaboration with engineering teams.
  - Build web-security testing automation and standardized AI-security testing checklists to improve consistency.
- CodeCluse | Threat Intelligence Intern** June 2024 – Dec 2024 | Remote
- Researched Linux persistence mechanisms and APT-40 tactics; developed 12 incident-response playbooks and 50+ WAF rules supporting mitigation of 150+ Go-based attacks.
- BrightChamps | Coding Educator** 2023 – 2024 | Remote
- Mentored students in foundational computational logic, modern coding concepts, and real-world project deployment.
  - Designed interactive programming sandboxes and assisted learners in resolving syntax, runtime, and logic errors.

## PROJECTS

- Custom C2 Framework | Python, Linux, Windows, Networking, Cryptography** 2023  
Built an authorized red-team training framework with Windows/Linux payload generation and real-time session management. ([Code Link](#))
- Network Scanner | Nmap, Gobuster, ffuf, Crackstation, Bash, HTML/CSS** 2022 – 2023  
Engineered a network and endpoint security scanner leveraging Nmap, Gobuster, and ffuf to automate port auditing, directory brute-forcing, and credential cracking, generating centralized reports. ([Code Link](#))
- Interactive Portfolio Web Application | HTML5, CSS3, JavaScript, Bootstrap** 2023  
Designed and deployed a responsive personal portfolio featuring custom DOM interactions, project showcases, and accessible layout configurations optimized for multi-device performance. ([Web Link](#)) ([Code Link](#))

## PUBLICATIONS & ACHIEVEMENTS

- Certifications:** Official (ISC)<sup>2</sup> Certified in Cybersecurity (CC), Cisco Certified Ethical Hacker, Junior Penetration Tester Certificate.
- Hackathons:** Grand Finalist at Smart India Hackathon (SIH); Finalist at BSides Pentathlon 2024 & Cybersecurity Hackathon 2023.
- CTF & Competitive Programming:** Ranked in the Top 10% globally on TryHackMe.

## LEADERSHIP & EXTRACURRICULAR

- IoT Lab Member:** Active core member collaborating on embedded systems and connected device experiments (2023 – Present).
- SpaceChase Drone Workshop:** Selected participant in hands-on UAV design hosted under the Ministry of Education.
- Community & Events:** Coordinated offline marketing and event logistics for collegiate technical competitions and CTF tournaments.
